Choosing a plan

- **Monthly**: maximum flexibility, billed in advance each month
- **Yearly**: the price of ten months, billed annually in advance
- **One-time**: a perpetual licence with 12 months of updates and Standard support; optional maintenance from year 2 at 18% of the licence price a year
- Move to a larger user band at any time and pay only the difference for the remaining period

Launch offer for founding clients

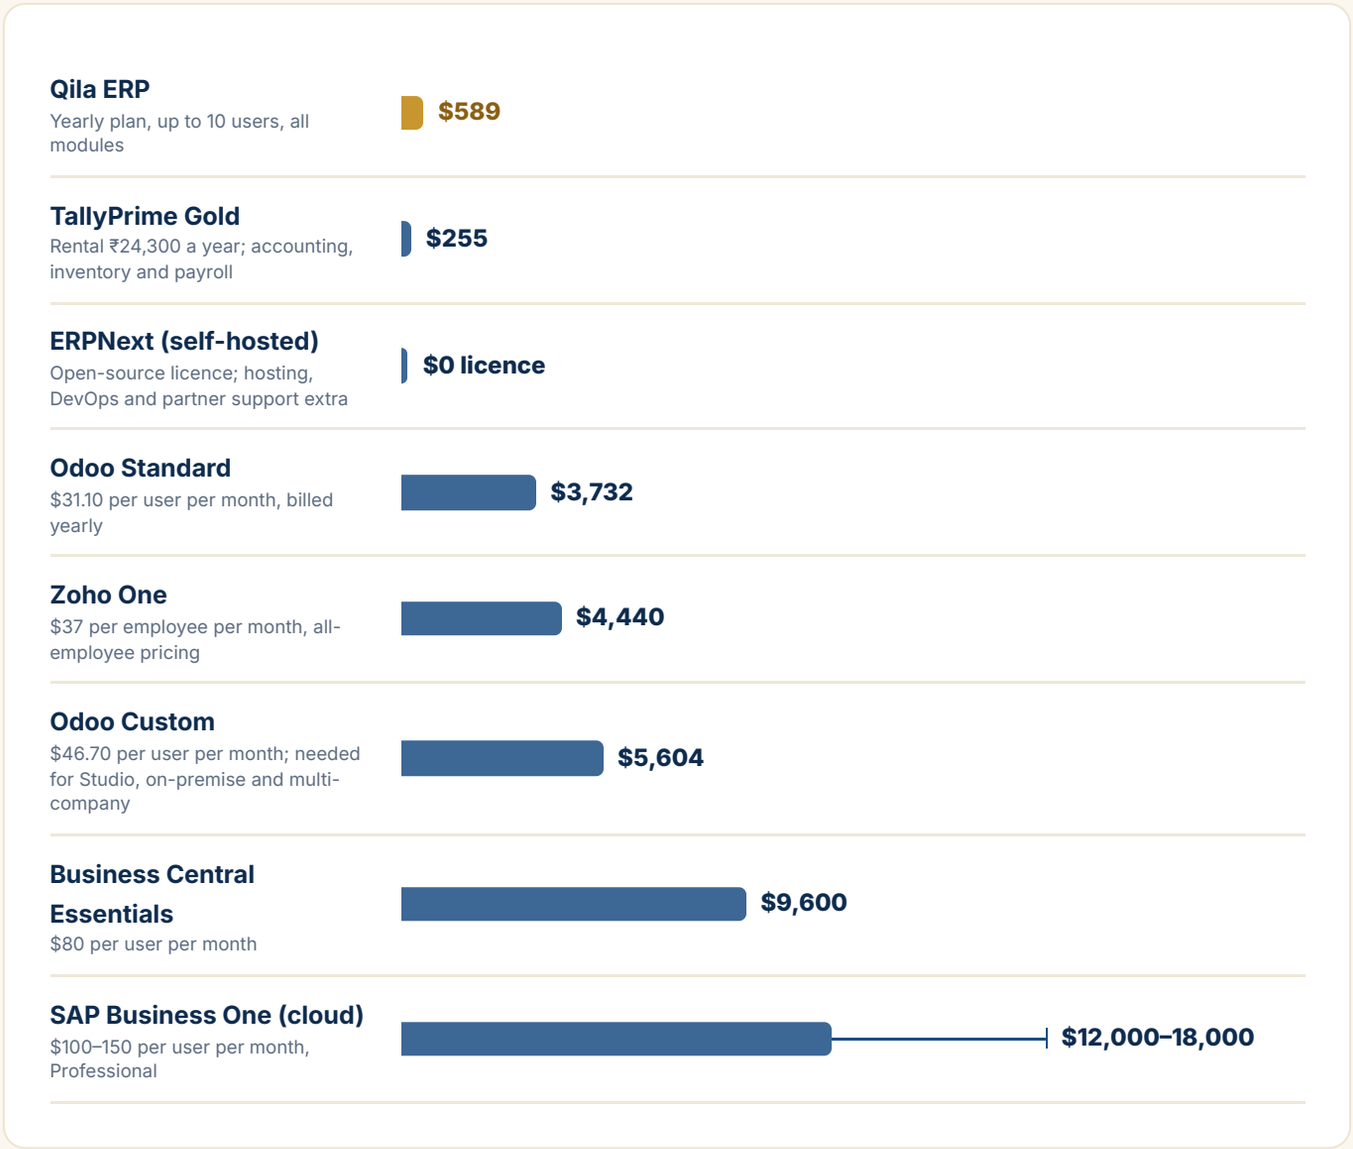

For the first 50 clients: the launch price is locked for 2 years, set-up is free with any yearly plan of 10 users or more, and the first year of maintenance is free with a one-time licence. Ask for details at info@qilaerp.com.

All prices in US dollars, excluding taxes (GST, VAT or other taxes as applicable). Invoices can be issued in local currency at the prevailing exchange rate on request. A licence covers one installation.

HOW QILA COMPARES

Licence cost for 10 users, per year

Annual licence cost in US dollars for a team of 10, at published list prices. Implementation, hosting and support are additional for every product.

Against TallyPrime

Tally costs less a year but covers accounting, inventory and payroll. Qila adds sales and POS, purchasing with approvals, manufacturing, workflows, automation, dashboards and industry packs.

Against open source

ERPNext has no licence fee, but hosting, DevOps and partner implementation typically cost $10,000–40,000 in India. Qila's set-up starts at $490 per company.

YOUR INFRASTRUCTURE

Costs paid directly by you

Qila runs on infrastructure you own and services you choose, contracted and paid by you directly with each provider. Figures are indicative and vary by provider, region and usage.

Item	Typical options	Indicative cost
Server Required	Managed business hosting (up to 10 users) · Cloud VPS 2 vCPU / 4 GB · 4 vCPU / 8 GB · 8 vCPU / 16 GB · or your own on-premises server	$10–20 · $24 · $48 · $96 per month plus provider backups, typically 20–30%
Domain and SSL Required	A sub-domain of your existing domain, or a new domain; free (Let's Encrypt) or commercial SSL certificate	$10–20 per year SSL free, or $50–200 per year
Outgoing email (SMTP) Recommended	Your business email provider, or a transactional email service	Usually included with business email
AI provider API key Optional	Anthropic, OpenAI, Google Gemini, Mistral, DeepSeek, Groq, OpenRouter, or a local model at no API cost. Consumer chat plans do not include API keys	Pay as you go to the provider you set a monthly spending limit inside Qila
WhatsApp Business Platform Optional	Your company's own WhatsApp Business account; Meta charges per delivered template message by category and country, plus any fees of your WhatsApp solution provider	Per Meta's rate card e.g. India from 1 Jan 2026: marketing ₹0.86, utility and authentication ₹0.115 per message
GST Suvidha Provider (GSP) Optional, India	For direct e-invoice and e-way bill generation; Qila always prepares the portal files without it	Per your GSP's plan

Why these costs are separate

Qila is installed on infrastructure you own, so you choose the provider, the region and the plan, and pay them directly. ABR Studio adds no margin to hosting, AI usage or messaging, and none of these services gives ABR Studio access to your data.

TERMS

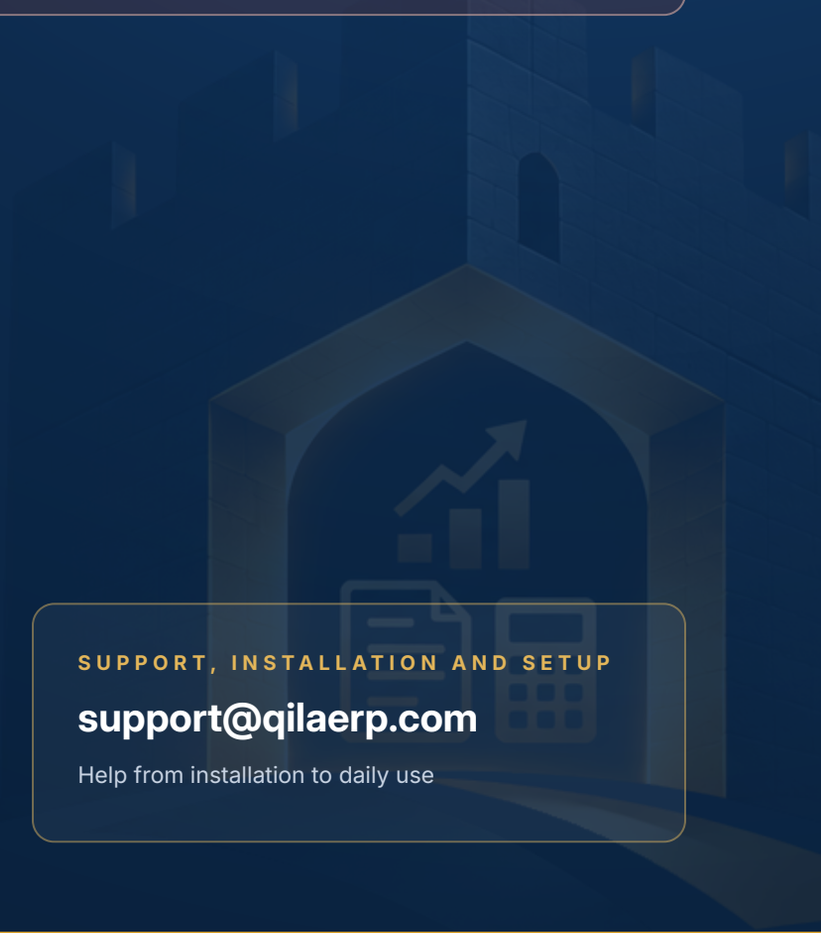

Terms and data responsibility

Terms

- Prices valid until 31 March 2027 and subject to change without notice
- Prices in US dollars, excluding GST, VAT and other applicable taxes
- Subscriptions are billed in advance; one-time licences are payable before activation
- A licence covers one installation; additional installations are licensed separately
- Set-up packages are priced per company and quoted after a short discovery call
- Third-party services are contracted and paid for by the client directly

Data responsibility

Qila ERP is installed on the client's own server. Qila ERP, ABR Studio and ABR Academy are not responsible for any loss of data, configuration, installation or set-up caused by failures of the client's hosting, server, network or infrastructure. Keeping the server and its data safe, including regular backups stored off the server, is the client's responsibility.
